## ReferNet-Germany

European information network for Vocational  
Education and Training

# ReferNet is

a European information network initiated by CEDEFOP (European Centre for the Development of Vocational Training).

It aims to meet the growing demand for comparable information on policies and developments in the area of Vocational Education and Training (VET).

The network builds upon national consortia in 27 European partner countries, Norway and Iceland. Every consortium is led by a coordinating institution and consists of key organisations involved in VET activities, including social partners. Annual work programmes are set up in cooperation with CEDEFOP.

The Federal Institute for Vocational Education and Training BIBB is the German ReferNet coordinating institution. Please find a list of the national consortium members on the back of this flyer.

Common report structures make it possible to compare the different national VET systems and political developments in the EU member states.

## Publications

### COUNTRY REPORT 2010

delivers a general overview about the training systems of all European countries. It is updated every year.
